

Please do not limit the scope of satellite radio! I realize that local stations often depend on traffic and weather to gain listeners, but satellite radio provides a great alternative to the free choices available. If you decide to limit the use of satellite radio, the consumer will lose! Please do not limit the choices of consumers only to protect an industry that is facing newer and tougher competition. Let the free market and consumers decide, not politics and lobbyists.

Thank you,

Rob Pierce
